CAREER OBJECTIVE

Recent B.Tech (Electronics and Communication Engineering) graduate with a strong foundation in cybersecurity and networking. Seeking an entry-level position to apply technical skills, learn from industry professionals, and contribute to organizational growth and security.

KEY SKILLS

Programming Languages: C++, Python

Cybersecurity Domains: Network Security, Digital Forensics, Cyber Threat Analysis, Vulnerability Assessment, OSINT, Information Gathering and Footprinting, Web Application Security, Email Security and Phishing Analysis, Incident Response, Malware Analysis, Firewall and IDS Concepts, VPN and Proxy Technologies, IP Addressing (IPv4/IPv6), Security Monitoring

Cybersecurity Tools: Kali Linux, Nmap, Wireshark, Burp Suite, Metasploit Framework, VMware, WHOIS, FTK Imager, VirusTotal, Hydra

Software and Databases: MS Office, Tkinter, SQLite

Core Knowledge: VLSI Design and Verification, Embedded Systems, Basic Computer Knowledge

EDUCATION

B.Tech (ECE) — Sri Shivani College of Engineering, Chilakapalem — 2022-2026 — CGPA: 7.37/10 (68.69%)

Intermediate — Sri Chaitanya Junior College, Visakhapatnam — 2016-2018 — 827/1000 (82.7%)

SSC (10th) — Victory School, Pathapatnam — 2016 — GPA: 9.0/10 (88.0%)

PROJECTS

Efficient Multi-Class Brain Tumor Classification Using Lightweight CNN Architecture on MRI Images

- Developed a lightweight Convolutional Neural Network (CNN) model for brain tumor classification using MRI images with improved accuracy.
- Optimized the model architecture to significantly reduce computational costs while maintaining robust classification performance.

Student Result Management System

- Developed a desktop application using Python and Tkinter GUI framework to manage and organize student records efficiently.
- Implemented an SQLite database backend for automated, accurate grade calculations and secure report generation.

INTERNSHIPS AND CERTIFICATIONS

- Certified Cyber Resilience and Forensic Investigator (CCRFI)**, Sytech Labs Pvt. Ltd — Practical training in Network Security, OSINT, Vulnerability Assessment, Web Application Security, Malware Analysis, Digital Forensics, and Incident Response. Hands-on experience with Kali Linux, Wireshark, Nmap, Burp Suite, Metasploit Framework, and FTK Imager.
- Introduction to Cybersecurity Job Simulation**, Commonwealth Bank (Forage) — Gained hands-on experience in practical cybersecurity workflows. Developed competencies in Data Analysis, Incident Response, Security Awareness, and Penetration Testing.
- Data Analytics Job Simulation**, Deloitte (Forage) — Completed a practical corporate simulation focusing on core data engineering and evaluation, strengthening skills in Data Analysis and Forensic Technology.
- Tata Cybersecurity Security Analyst Job Simulation**, Forage (Tata Consultancy Services) — Completed a job simulation involving identity and access management (IAM), collaborating with a Cybersecurity Consulting team. Acquired expertise in IAM principles, cybersecurity best practices, and strategic alignment with business objectives. Delivered comprehensive documentation and presentations, showcasing the ability to communicate complex technical concepts effectively.
- Artificial Intelligence Certification** — Infosys Foundation Finishing School for Employability Program.
- VLSI Design and Verification Internship** — Technical training in functional verification, logic synthesis, and digital hardware design concepts.

STRENGTHS

- Self-motivated and hardworking, with a results-driven approach.
- Proven ability to perform efficiently and maintain focus under pressure.
- Quick learner with strong problem-solving capabilities.
- Collaborative team player with excellent communication and interpersonal skills.

PERSONAL DETAILS

Nationality: Indian

Languages Known: Telugu, English, Hindi
